66547 7590 11/05/2007 THE FARRELL LAW FIRM, P.C. 333 EARLE OVINGTON BOULEVARD SUITE 701 UNIONDALE, NY 11553			EXAMINER BURD, KEVIN MICHAEL	
			ART UNIT 2611	PAPER NUMBER
			MAIL DATE 11/05/2007	DELIVERY MODE PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

51

<b>Office Action Summary</b>	<b>Application No.</b> 10/607,106	<b>Applicant(s)</b> KIM ET AL.	
	<b>Examiner</b> Kevin M. Burd	<b>Art Unit</b> 2611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 17 October 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 and 7 is/are rejected.
- 7) ☒ Claim(s) 2-6 and 8-13 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

1. This office action, in response to the amendment and request for continued examination (RCE) filed 10/17/2007, is a non-final office action.

***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/17/2007 has been entered.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1 and 7 have been considered but are moot in view of the new ground of rejection.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dent (US 5,894,473) in view of Vihriala (US 2002/0045433) further in view of Nangia et al (US 7,139,237).

Regarding claims 1 and 7, Dent discloses an apparatus and method of estimating multiple access interference and recovering user data as shown in figure 5(a). A multi-user signal is received and mixed with a first code (130 and 132). The user signal is decoded and output. The decoded signal is re-encoded and re-modulated (146) and input to a subtractor (148). The subtractor subtracts the re-encoded signal from a delayed version of the input signal to remove the first user signal. The first user signal will act as interference on the subsequent user signals. The output of the subtractor is fed back to a second stage 140'. The second stage will repeat the process stated above to recover the second user signal. The processes will continue to be repeated until all available or desired users are recovered. Dent does not disclose calculating a frequency offset of the input signal and compensating for that frequency offset. Vihriala discloses an apparatus and method for estimating the frequency offset from a received signal. Vihriala discloses a complex phasor is generated for compensating the frequency offset. The frequency compensation can be made before or after the channel estimation thus producing feedback compensation (paragraph 0013). The circuitry for generating the complex phasor for compensating the frequency offset is shown in figures 5 and 6. The frequency offset is estimated from the channel estimate (paragraph 0013 and figure 5). The correction of frequency offset in the receiver increases the accuracy of the channel estimate and increases performance

(paragraph 0008). For this reason, it would have been obvious for one of ordinary skill in the art at the time of the invention to combine the method and apparatus of Vihriala into the receiver of Dent. The combination is directed for use in a CDMA communication system but suggests application in other multiple access systems such as TDMA. The combination does not disclose applying the method and apparatus to an interleaved frequency division multiple access (IFDMA) communication system. Nangia discloses a multi-rate multi-user IFDMA communication system (abstract). Nangia further discloses other multiple access protocols such as code division multiple access (CDMA) protocols can be used in conjunction with or run on top of the multi-rate IFDMA scheme described herein (column 15, lines 34-43). The combined CDMA/IFDMA scheme described will be an IFDMA system. Using multiple coding protocols will increase security of the transmitted data and the signal will be more resistant to interference. For this reason, it would have been obvious for one of ordinary skill in the art at the time of the invention to combine the teachings of Nangia into the combination of Dent and Vihriala.

***Allowable Subject Matter***

5. Claims 2-6 and 8-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Burd whose telephone number is (571) 272-3008. The examiner can normally be reached on Monday - Friday 9 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David C. Payne can be reached on (571) 272-3024. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
